

MUHAMMAD ZAIN UL AABDIN

Penetration Tester | Offensive Security Specialist

Pakistan | +92 307 5857919 | redhatzayn@gmail.com | [linkedin.com/in/zxain](https://www.linkedin.com/in/zxain)

PROFESSIONAL SUMMARY

Penetration Tester with 2+ years of paid, hands-on offensive security experience across web applications, APIs, networks, and cloud environments (AWS, Azure, GCP). Delivered 55+ authorized engagements for clients spanning e-commerce, fintech, and enterprise hybrid infrastructure, uncovering 100+ vulnerabilities and improving client remediation rates through clear, risk-prioritized reporting. Comfortable working independently in fully remote, cross-timezone teams. Open to remote roles internationally; no sponsorship required.

PROFESSIONAL EXPERIENCE

Penetration Tester — Cybervol (Remote)

Apr 2024 – Nov 2025

- Led 40+ end-to-end authorized penetration tests across hybrid on-prem/cloud environments, identifying 100+ vulnerabilities including critical business-logic and configuration flaws.
- Delivered risk-prioritized vulnerability reports and remediation roadmaps to executive and engineering stakeholders, improving closure rates on critical findings by 30%.
- Partnered directly with DevOps teams to remediate 80+ API and microservices issues, cutting critical vulnerability dwell time by 40%.

Security Consultant — Freelance (Remote)

May 2020 – Mar 2024

- Delivered black-box and gray-box penetration tests for 15+ international clients across e-commerce and financial services, identifying high-severity design and configuration flaws.
- Built detailed exploit chains, proof-of-concepts, and remediation blueprints aligned to OWASP and NIST standards, strengthening clients' audit readiness and security posture.
- Ran security awareness sessions and tabletop exercises for engineering teams, increasing internal vulnerability reporting and reducing recurring misconfigurations.

TECHNICAL SKILLS

- Offensive Security: Web application testing (WAPT), network penetration testing, API security testing, cloud security (AWS, Azure, GCP), red teaming, social engineering, threat modeling, OWASP Top 10, PTES methodology.
- Tools: Kali Linux, Burp Suite Professional, Metasploit, Nmap, Wireshark, SIEM platforms, SAST/DAST tooling.
- Programming & Compliance: Python, Bash/shell scripting, CVE analysis, vulnerability risk remediation, incident response, GDPR, HIPAA, PCI DSS.

CONTINUOUS LEARNING & TECHNICAL COURSEWORK

- Advanced Offensive Security — Udemy / Coursera (2023)
- Threat Hunting & Cryptography — Coursera (2022)
- Ethical Hacking: Pentesting — Udemy (2022)
- Linux Privilege Escalation — ZSecurity (2021)
- Web Security Testing & Bug Bounty — ZSecurity (2020)

EDUCATION

Bachelor of Science, Computer Science (BSCS)

Karachi University

Jan 2024
